

AZEK Moulding Profiles

Crown Profiles

Crown moulding profiles are typically decorative mouldings designed for use along the intersection of a wall and ceiling. May be combined with other mouldings to create a "built-up" profile.

Cove Profiles

Cove profiles are typically used along the intersection of a wall and ceiling.

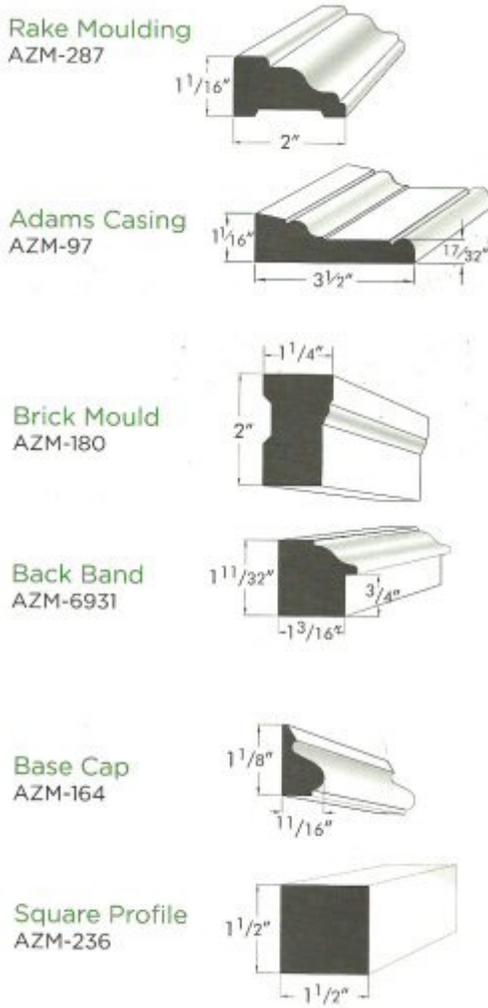

Shingle Band Profiles

Shingle Band is designed for use as a window or door casing or as a decorative shoe base.

Casing Profiles

Casting profiles are decorative mouldings typically used flush against a wall, door or window to create surrounds.

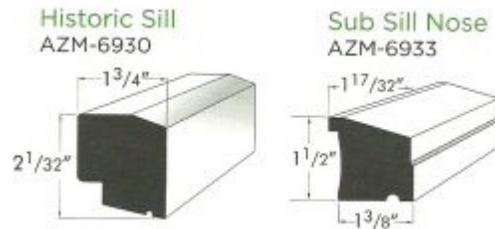

Drip Cap Profiles

Drip Cap is typically used as a water table or brick ledge for separation and water shed against two differing material types.

Sill Profiles

Sill profiles shed water and offer architectural detail.

Garage Door Thermostop

Popular moulding profile designed to assist with sealing new or existing garage door openings to minimize weather and moisture intrusion.
